## Technical Information

**Product:** Back Pressure Valves  
Pressure Relief Valves

**Release #:** 2009-001

**Subject:** Diaphragm Replacement Interval

Griffco Pressure Relief and Back Pressure valves are designed to minimize the amount of maintenance required to keep the valves in operation. However, as stated in the Instruction Manual documentation that ships with each valve, “periodic” replacement of the diaphragm is required.

Griffco suggests that in most cases, considering a two (2) year interval for initial diaphragm replacement is generally satisfactory. Parameters differ widely from valve to valve with respect to actual field use conditions, and for this reason we defer to the end user as best qualified to determine appropriate replacement intervals suited to their particular applications.

**Note:** Although the information presented herein is presented in good faith and believed to be correct, Griffco Valve Inc., makes no guarantee or representation as to the completeness or accuracy thereof, and disclaims all liability for loss or damage resulting from use or reliance upon any information, recommendations or suggestions contained herein. Any selection made is at the responsibility of the end user.
